Note:
1. This table will be updated in line with firmware update and is subject to change without prior notice;
2. Balance adjustment of specific cameras and lenses is shown in the attached table;
3. Camera models that are not listed in the table will be tested in the future according to market feedback.

Attached Table :
1. "Can be balanced at any focal length" means stabilizer balance can be achieved at both ends of the zoom lens.
2. For compatibility with camera models and lenses that are not listed in the table, users are free to carry out tests by themselves. Cameras whose weights are within the bearing range of CRANE PLUS and can be balanced on it are workable with CRANE PLUS;
