Note: 1.This table will be updated in line with the firmware and is subject to change without a prior notice. 2. Balance adjustment is shown in the attached table. 3.Camera models that are not listed in the table will be tested in the future according to market feedback. 4. SONY A7/ A7S/A7S2/A7R/A7R2/A7M2/A6000/A6300, don't turn on the stabilizer under the video mode when applying the image transmission feature. If you need to use video mode, please turn on the stabilizer under other modes and switch back to the video mode. 6.When the SONY camera connects to the WEEBILL LAB under the video mode and needs to connect to the recorder or HDMI external device, the external device is not available. When WEEBILL LAB connects to a SONY camera with the Steadyshot feature, part of the cameras will shut down automatically. 7. Image transmission is not available on Sony A7/A7R/A6000.
